

IF THAT  
EXAM WERE  
A PATIENT,  
YOU WOULDN'T  
BACK DOWN.

That's what I had to tell myself. After all my years of experience, I was terrified I wouldn't pass. And then I realized something: I save lives every day! Why should I be afraid of a test? It's all about learning and becoming better at what I do, so I can provide better care to my patients. Certification says that to the world, and most importantly, to myself. I have what it takes to become certified.
