- Fluid and Electrolytes
- Acute Kidney Injury (AKI)
- Nutritional Support
- Glycemic Control
- Transfusion Management
- Multisystem Disorders and Management

Areas that are evaluated by the Knowledge Assessment Tool align with AACN's ECCO course modules.

Product Features

Developed by AACN, the Knowledge Assessment Tool features:

- **Two clinical assessment options** — Separate ICU and PCU assessments are available to ensure that orientees receive content focused on their area of practice.
- **Randomized assessment questions** — Each assessment features randomly generated questions and answers for each area of focus to ensure that every exam is unique and secure.
- **Easy-to-read score results** — Simplified scoring from below minimum to proficient in each focus area provides quick identification of knowledge proficiency in each key area of focus.
- **Compatibility with other AACN orientation products** — New nurse orientation can be enhanced even further by incorporating ECCO and the Nurse Competence Framework and Toolkit.

Technical Features and Benefits

- The tool is accessible online with instant results.
- Assessment tool content is reviewed and updated at regular intervals to ensure the latest information and practices are provided.
- Educators are provided with reports that provide recommended educational content to plan educational offerings to help learners gain the knowledge they need.

AACN's comprehensive offerings support nurses, hospitals and other institutions by bolstering nurses' expertise and elevating patient outcomes. All AACN eLearning courses and products are delivered in a convenient, interactive environment that keeps learners focused and stimulated. With courses and products that include content on pediatric and adult care, AACN's portfolio reflects the latest evidence-based practices.
