Reflex Testing Assessments
Doll's Eyes and Cold Caloric

Assist in the process of conducting doll's eyes (oculocephalic) and cold caloric (oculovestibular) reflex testing to assess for terminal brainstem dysfunction.

**Doll's Eyes**
- Head to the left: Eyes to the right
- Central: Normal response
- Head to the right: Eyes to the left

**Cold Caloric**
- Normal tonic response: Both eyes move
- Asymmetrical response: One eye moves
- Negative response: No eye movement
