Put Your Knowledge and Experience to Work for You

Are you ready to challenge yourself? Validate your clinical knowledge and elevate your practice with CCRN specialty certification from AACN. CCRN is the gold standard in critical care nursing certification.

Which CCRN credential is right for you?

**CCRN**
Critical Care Direct Care Nurse
You provide direct care to acutely/critically ill (adult, pediatric or neonatal) patients, regardless of their geographic location.

**CCRN-K**
Critical Care Knowledge Professional
You apply knowledge that influences the care delivered to acutely/critically ill (adult, pediatric or neonatal) patients, but do not primarily or exclusively provide direct care.

**CCRN-E**
Critical Care Remote TeleICU Nurse
You focus on monitoring and caring for acutely/critically ill (adult) patients by camera from a centralized or remote teleICU location that is networked to the bedside.

The majority of practice hours for CCRN, CCRN-K and CCRN-E eligibility must be with critically ill patients.
